## WORK EXPERIENCE

### IT Officer

#### Mosra Enerji

📅 February 2022 – current

📍 Abuja, NG

- Installation, configuration, and troubleshooting of computer systems software, hardware, applications, and operating systems.
- Monitoring and maintaining networks and security.
- Diagnosing systems, networks, and resolving hardware and software faults.
- Set up new and existing users' accounts and profiles, and handle password related issues.
- Communicate with staff through a series of actions, face-to-face, through phone calls, via remote support to set up systems or address their difficulties.

### DevOps Engineer

#### Udacity AWS Cloud DevOps Engineer Program

📅 April 2022 – September 2022

📍 Remote

- Automated deployment of new servers using Ansible, reducing time to provision a server from 2 hours to 15 minutes.
- Managed and maintained Linux servers, Kubernetes clusters, AWS instances, and Docker containers.
- Shared best practices while implementing infrastructure as code using CloudFormation.
- Implemented continuous integration and delivery pipeline using Ansible, GitHub, Docker and Kubernetes clusters.

### Web and Mobile App Developer

#### Center for Technology and Innovation

📅 July 2018 – September 2019

📍 Kuala Lumpur, Malaysia

- Collaborate with a team of software architects, senior developers, and IT managers to define the release management process.
- Managed the transition between project planning and software deployment for a team of 6 developers.
- Ensured 100% of project documentation was created and updated, including design, development, and deployment.
- Worked with internal stakeholders, engineers, data scientists, cloud platform engineers, and other technologists across the business.
- Ensured 80% of the implementation for Asia Pacific University Malaysia attendance system using the Quick Response (QR) Code and One-Time Password (OTP).

## EDUCATION

### Bachelor of Science

Software Engineering

#### Asia Pacific University

📅 November 2019

📍 Kuala Lumpur, Malaysia

### Diploma

Software Engineering

#### APTECH Computer Education

📅 May 2016

📍 Abuja, Nigeria

## SKILLS

HTML/CSS

JavaScript (React, Angular)

Java

Python

SQL (MySQL)

Git

DevOps (AWS)

Operating System (Windows, Linux)

## SUMMARY

Incredibly focused software engineer with software design, architecture, and methodology skills. Inspired to utilize the skills in a fast-paced environment and grow expertise in a collaborative workspace. Possess the ability to learn and master new technology.
